

# The Peaky Lighters

INSTALLATION INSTRUCTIONS

# LED HOUSE SIGN INSTRUCTIONS

**TO BE INSTALLED BY A QUALIFIED  
ELECTRICIAN**

## **1. Unpack the Components:**

- Carefully remove all packaging materials.

## **2. Disassemble the Sign:**

- Remove the acrylic front cover and the acrylic light diffuser.

## **3. Prepare the Wall:**

- Use the rear base to align, level, and mark the positions for the drill holes.

## **4. Drill Holes:**

- Drill the marked holes using a 5.5mm SDS drill bit.
- Insert red Rawl plugs into the drilled holes.

# LED HOUSE SIGN INSTRUCTIONS

## **5. Feed the Cable:**

- **Feed the cable through the grommet on the rear of the light base.**
- **Ensure that rubber grommets are attached to the screws and that spacers are inserted on the rear of the base before mounting.**

## **6. Mount the Rear Base:**

- **Secure the rear base to the pre-drilled holes in the wall using the screws.**

## **7. Connect Electrical Wiring:**

- **Connect the mains cable to the connectors on the rear base:**
- **Live (Brown/Red)**
- **Neutral (Blue/Black)**

# LED HOUSE SIGN INSTRUCTIONS

## **8. Reassemble the Sign:**

- **Refit the light diffuser and the front cover, ensuring to remove the protective film from both sides of each piece.**
- **If provided, fit the 1.5mm black sheet directly after the rear diffuser to prevent light from passing through the front cover.**

## **9. Secure the Front Cover:**

- **Use the provided cap head bolts and rubber washers to secure the front of the sign.**

## **Maintenance for Wooden LED Signs**

### **Pre-oiled/Sealed Signs:**

- **If the sign was pre-oiled or sealed before delivery, re-oil or reseal the wood every 6 months to maintain its quality and integrity.**

### **Non-oiled Signs:**

- **If the sign was not oiled before delivery, it is recommended to oil or seal it before installation.**

# ACRYLIC SIGN INSTRUCTIONS

## **1. Unpack Components:**

- **Carefully remove all packaging materials.**

## **2. Prepare the Wall:**

- **Use the rear base to align, level, and mark the positions for the drill holes.**

## **3. Drill Holes:**

- **Drill the marked holes using a 5.5-6mm SDS drill bit.**
- **Insert red Rawl plugs into the drilled holes.**

## **4. Remove Protective Film:**

- **Peel off the protective film from both sides of the rear base and the front acrylic sign.**

# ACRYLIC SIGN INSTRUCTIONS

- **5. Attach Standoffs:**
  - **Attach the provided standoffs to the rear base.**
- **6. Mount the Sign:**
  - **Using the provided screws and front caps, secure the front and rear base to the wall.**
- **7. Secure the Caps:**
  - **Close the lids on the screw caps to finish the installation.**

# WOODEN SIGN INSTRUCTIONS

- **1. Unpack Components:**
  - Carefully remove all packaging materials.
- **2. Mark the Wall:**
  - Use the wooden sign to align, level, and mark the positions for the drill holes on the wall.
- **3. Drill Holes:**
  - Drill the marked holes using a 5mm SDS drill bit.
  - Insert yellow Rawl plugs into the drilled holes.
- **4. Attach Standoffs:**
  - Attach the provided standoffs to the rear base of the sign.

# WOODEN SIGN INSTRUCTIONS

- **5. Mount the Sign:**
  - **Using the provided screws and front caps, secure the sign to the wall.**
- **6. Secure the Caps:**
  - **Close the lids on the screw caps to complete the installation.**

## **Maintenance**

### **Pre-oiled/Sealed Signs:**

- **If the sign was pre-oiled or sealed before delivery, it is recommended to re-oil or reseal the wood every 6 months to maintain its quality and integrity.**

### **Non-oiled Signs:**

- **If the sign was not oiled before delivery, it is recommended to oil or seal it before installation.**
